-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 17 June 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

Claims 20, 22-24 and 26-44 are pending in this application.

### ***Action Summary***

Any rejections of record that are not repeated below are considered withdrawn.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20, 26, 27, 31, 32, 41 and 44 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3 and 13 of U.S. Patent No. 6,709,650 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the patent and

the instant application are directed to a therapeutic composition for administering a dry, discrete microparticle having a water-soluble material, therapeutic agent, wherein the microparticle has a mean size of between 1 and 10 microns. The difference between the two is in the patent the water-soluble material can optionally be the therapeutic agent. Although the claims instant application does not disclose this limitation, the claim is broad enough to encompass that limitation. A further difference is that the instant invention is directed to a hollow microparticle. It is the position of the examiner that since the patent is directed to a microcapsule, the instant invention reads on that limitation also. It is well known in the art that capsules are hollow, with the purpose of encapsulating drugs, excipients, etc. for therapeutic or cosmetic use.

### ***Claim Objections***

Claim 36 objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Applicant claims in claim 36 that the microparticles are spray-dried. Applicant has amended claim 1 to recite that the microparticles are hollow and spray-dried, this is redundant.

***Allowable Subject Matter***

Claims 22-24, 28-30, 33-35, 37-40, 42 and 43 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach the composition as claimed together with the limitations of claims 22-24, 28-30, 33-35, 37-40, 42 and 43.

***Conclusion***

Claims 20, 26, 27, 31, 32, 41 and 44 are rejected.
